🧠 SKILLS

HTML5

Experienced in using **HTML5** to create well-structured, semantic, and accessible web pages. Proficient in utilizing the latest HTML5 elements and APIs to enhance the functionality and performance of modern websites, ensuring compatibility with all major browsers.

CSS3

Skilled in **CSS3** for crafting visually stunning layouts, animations, and transitions. Expertise in **Flexbox** and **CSS Grid** for creating responsive, adaptive, and fluid designs that look great across all devices. Strong understanding of CSS best practices, including modular styling and the use of preprocessors like Sass.

JavaScript (JS)

Solid understanding of core JavaScript concepts, including variables, functions, conditionals, loops, and events. Able to use JavaScript to add interactivity to web pages, handle form validation, manipulate the DOM, and work with simple logic to improve user experience.

Responsive Designing

Skilled in creating **responsive websites** using **mobile-first** design principles. Proficient in media queries and flexible layouts, ensuring optimal user experience across all screen sizes and devices. Strong focus on performance and accessibility in mobile design.

Cross-Browser Compatibility

Experienced in ensuring **cross-browser compatibility**, guaranteeing consistent design and functionality across different web browsers, including Chrome, Firefox, Safari, and Edge. Adept at troubleshooting and fixing browser-specific issues to deliver a seamless user experience for all visitors.
